TOTAL MINUTES ENGINE IN GEAR

Skipper/Charterer	Crew Member One	Crew Member Two

FILING – File your CRUZ Class Engine Log with NOSA Race Headquarters.

LIMITATIONS – Total engine propulsion time is not limited for CRUZ Class boats. A vessel’s speed in knots may not exceed its hull speed while the engine is in-gear propelling the boat. Hull speed is defined as 1.34 x Square Root (LWL), where “LWL” is the length of the waterline in feet.
